Module 1: Assignment "Design Your Future AI"

Total points: 100

Hello Class:

This assignment challenges you to **imagine and design a future AI system** tailored to help people in a **non-STEM field** such as arts, journalism, education, law, public service, or social work. You'll showcase your ideas in a **creative and informative document** that clearly describes the purpose, functionality, and potential ethical concerns of your AI.

What You Need to Do

- **Design your own AI System**
  Think about a real problem in a non-STEM field that could be improved with AI. Then create an imaginary AI system that helps solve that problem.
- **Create a document or slide deck** (Word or PDF only) that includes:
  - A clear description of your AI system (What does it do?)
  - How your AI will help people or solve a problem
  - Any ethical risks or challenges (e.g., fairness, bias, privacy)
  - Visual elements (a drawing, chart, diagram, or screenshot from Canva, PowerPoint, Google Slides, etc.)

Submission Format Requirements:

Submit your assignment as either:

- A Microsoft Word document (.doc or .docx), or
- A PDF file (.pdf)

At the top of your submission, include:

- Your Full Name
- Course Title: *Introduction to AI for Non-STEM Students*
- Instructor: [Insert Instructor Name]
- Date: [Insert Date]
- Assignment Title: *Design Your Future AI*

At the bottom, include a "**Resources Used**" section listing any tools, images, readings, or websites you used.

Deadlines

- **Submit your final assignment by:** [Insert Due Date]

This assignment follows a rubric!

Rubric

Total: 100 points

Criterion	Performance levels	Score
Problem and purpose Maximum 20 points	**Exceeds expectations (18-20):** Defines a meaningful non-STEM problem and clearly explains the purpose of the proposed AI system. **Meets expectations (15-17):** Identifies a relevant problem and a clear AI purpose. **Developing (10-14):** Problem or purpose is only partly defined. **Incomplete (0-9):** Problem and purpose are missing, unclear, or unrelated.	____ / 20
System functionality and benefit Maximum 20 points	**Exceeds expectations (18-20):** Clearly explains what the AI does, how it works at a conceptual level, and how it helps people or solves the problem. **Meets expectations (15-17):** Explains the system's main functions and benefits. **Developing (10-14):** Provides a partial description with limited connection to the problem. **Incomplete (0-9):** Functionality or benefit is missing or unclear.	____ / 20
Ethical risks and challenges Maximum 20 points	**Exceeds expectations (18-20):** Thoughtfully analyzes relevant risks such as fairness, bias, privacy, or accountability and connects them to the proposed system. **Meets expectations (15-17):** Identifies relevant ethical risks and explains their importance. **Developing (10-14):** Mentions risks but provides limited analysis. **Incomplete (0-9):** Ethical risks are missing or unrelated.	____ / 20
Visual element Maximum 20 points	**Exceeds expectations (18-20):** Includes a clear, relevant visual that strengthens the explanation of the system. **Meets expectations (15-17):** Includes a relevant and understandable visual. **Developing (10-14):** Includes a visual with limited relevance, clarity, or labeling. **Incomplete (0-9):** Required visual is missing.	____ / 20
Organization and communication Maximum 10 points	**Exceeds expectations (9-10):** The document or slide deck is coherent, engaging, and easy to follow. **Meets expectations (7-8):** The work is organized and understandable. **Developing (4-6):** Organization or clarity is inconsistent. **Incomplete (0-3):** The submission is difficult to follow or substantially incomplete.	____ / 10
Format and resources Maximum 10 points	**Exceeds expectations (9-10):** Includes all required identifying information, uses an accepted file format, and lists tools, images, readings, and websites used. **Meets expectations (7-8):** Meets the main formatting and resources requirements with only minor omissions. **Developing (4-6):** Misses one or more required formatting or resources elements. **Incomplete (0-3):** Does not follow the required format or omits the Resources Used section.	____ / 10
