Module 1: Ice Breaker Activity Discussion - "AI in My Life"

Total points: 20

Hello class:

This discussion is designed to help you recognize how **Artificial Intelligence (AI)** shows up in your everyday life—even in ways you might not realize. AI isn't just for scientists or engineers—it's in your phone, your playlists, your social media feeds, and even your shopping carts.

Let's kick things off by sharing our own experiences with everyday AI.

Instructions:

Step 1: Think of a time today (or this week) when you interacted with something powered by AI. If you're not sure, here are some examples to spark ideas:

- Did you ask Google or Siri a question?
- Did your GPS suggest a route?
- Did Amazon recommend a product?
- Did your phone suggest an emoji or reply to a message?
- Did you see a filter on Instagram or TikTok?

Step 2: Create a short post (3–4 sentences) answering the following:

- What was the AI-powered tool or app?
- What did it help you do?
- Did it work well, or was it frustrating?
- Did you realize this was AI before now?

Step 3: Reply to at least two classmates' posts with a thoughtful comment or question. You may:

- Compare their experience with yours
- Share another way you've seen that type of AI used
- Ask if they think that AI was helpful or invasive

Deadline:

- **Post your original response by:** [Insert Date]
- **Reply to two classmates by:** [Insert Date + 2 days]

Tips for Success:

- You don't need to be technical—just share your honest experience!
- Use real-life apps and tools you already know.
- Be kind, curious, and respectful when replying to classmates.

Let's discover how much AI is already in our lives—together!

This discussion follows a rubric.

Rubric

Total: 20 points

Criterion	Performance levels	Score
Initial post completion Maximum 5 points	**Exceeds expectations (5):** Answers every prompt in a focused 3-4 sentence post. **Meets expectations (4):** Answers most prompts in a complete post. **Developing (2-3):** Answers some prompts, but key details are missing. **Incomplete (0-1):** Post is missing, incomplete, or does not address the prompt.	____ / 5
Everyday AI example and reflection Maximum 5 points	**Exceeds expectations (5):** Uses a specific AI-powered tool and clearly reflects on what it did and how well it worked. **Meets expectations (4):** Uses a relevant AI example and explains the experience. **Developing (2-3):** Names an example but provides limited explanation or reflection. **Incomplete (0-1):** Example is absent, unrelated, or unsupported.	____ / 5
Replies to classmates Maximum 5 points	**Exceeds expectations (5):** Provides two thoughtful replies that compare experiences or ask useful questions. **Meets expectations (4):** Provides two relevant and respectful replies. **Developing (2-3):** Provides one substantive reply or two very brief replies. **Incomplete (0-1):** Replies are missing or do not engage with classmates' ideas.	____ / 5
Clarity and respectful participation Maximum 5 points	**Exceeds expectations (5):** Writing is clear, timely, curious, and consistently respectful. **Meets expectations (4):** Writing is understandable and respectful with minor issues. **Developing (2-3):** Writing or participation is occasionally unclear, late, or insufficiently respectful. **Incomplete (0-1):** Writing is difficult to follow or participation does not meet course expectations.	____ / 5
