AI Definitions Scavenger Hunt

Hello Class:

The **objective** of this assignment is for you to begin exploring basic Artificial Intelligence (AI) vocabulary by finding and defining key terms using **Open Educational Resources (OER)**.

Instructions

1. **Choose 5 important AI terms** that you've encountered in this module. Examples include:
   - Algorithm
   - Neural Network
   - Intelligent Agent
   - Machine Learning
   - Artificial General Intelligence (AGI)

   (You may choose other relevant terms if approved by the instructor.)
2. **Define each term** in your own words using reliable **Open Educational Resources (OER)** such as:
   - Elements of AI
   - AI4ALL Open Curriculum
   - MIT OpenCourseWare
   - Khan Academy
3. **Create a table** (recommended) or a slide deck that includes:
   - **Term**
   - **Definition**
   - **Include the Source (with hyperlink if possible)**
4. **Submit your assignment** as either:
   - A **Microsoft Word document (.doc or .docx)**, or
   - A **PDF file (.pdf)**
5. **Submission Format Requirements:**
   - Your Word or PDF file must include the following at the top of the document:
   - Your Full Name
   - Course Title: [Insert Course Name, e.g., Introduction to AI for STEM Students]
   - Instructor: [Insert Instructor's Name]
   - Date: [Insert Date]
   - Assignment Title: AI Definitions Scavenger Hunt
   - At the bottom of the document or slides, include a **"Resources Used"** section listing all the websites or materials you used, with URLs or full titles.

This assignment follows a grading rubric.
