Module 1: Quiz _ Introduction to AI

1 True or False 1 point

Deep Learning uses neural networks to analyze data.

- ◯ True
- ◯ False

2 True or False 1 point

Today's AI systems are considered Artificial General Intelligence (AGI).

- ◯ True
- ◯ False

3 True or False 1 point

Machine Learning (ML) and Deep Learning (DL) are exactly the same.

- ◯ True
- ◯ False

4 True or False 1 point

Artificial Intelligence (AI) is a subfield of Machine Learning (ML).

- ◯ True
- ◯ False

5 True or False 1 point

Artificial General Intelligence (AGI) is a type of AI that can perform a wide range of tasks like a human.

- ◯ True
- ◯ False

6 Multiple Choice 1 point

Who is credited with the Turing Test, which asks whether a machine can imitate human responses?

- ◯ Alan Turing
- ◯ Geoffrey Hinton
- ◯ Elon Musk
- ◯ John McCarthy

7 Multiple Choice 1 point

Which term describes a machine or system that interacts with the environment to achieve a goal?

- ◯ Auto-Responder
- ◯ Intelligent Agent
- ◯ Expert System
- ◯ Deep Learner

8 True or False 1 point

AI can currently understand emotions the way humans do.

- ◯ True
- ◯ False

9 Multiple Choice 1 point

Which of the following is an example of Machine Learning?

- A keyboard converting keystrokes to letters
- A thermostat learning your preferred temperature over time
- A calculator solving math equations
- An email server sending a message

10 Multiple Choice 1 point

Which of the following would most likely use Deep Learning?

- A microwave oven
- A voice assistant recognizing speech
- A word processor checking spelling
- A basic calculator

11 True or False 1 point

An intelligent agent can perceive its environment and take actions.

- True
- False

12 True or False 1 point

The term "Artificial Intelligence" was first used in the 21st century.

- True
- False

13 Multiple Choice 1 point

Which of these is an accurate hierarchy of terms from broad to specific?

- DL > ML > AI
- ML > AI > DL
- AI > DL > ML
- AI > ML > DL

14 Multiple Choice 1 point

Which one of these is an example of AI in daily life?

- Walking your dog
- Washing dishes by hand
- Watching TV with the remote
- Asking Alexa to play music

15 Multiple Choice 1 point

Which of the following best describes Artificial Intelligence?

- Systems that mimic human intelligence to solve problems
- Software that can display advertisements
- A robot with emotions
- A type of smartphone
