1 True or False 1 point

Artificial Intelligence (AI) is a subfield of Machine Learning (ML).

- ○ True
- ● False

2 True or False 1 point

An intelligent agent can perceive its environment and take actions.

- ● True
- ○ False

3 True or False 1 point

Machine Learning (ML) and Deep Learning (DL) are exactly the same.

- ○ True
- ● False

4 Multiple Choice 1 point

Which of the following best describes Artificial Intelligence?

- ○ A robot with emotions
- ○ Software that can display advertisements
- ● Systems that mimic human intelligence to solve problems
- ○ A type of smartphone

5 Multiple Choice 1 point

Which of the following is an example of Machine Learning?

- ○ A calculator solving math equations
- ● A thermostat learning your preferred temperature over time
- ○ An email server sending a message
- ○ A keyboard converting keystrokes to letters

6 True or False 1 point

Deep Learning uses neural networks to analyze data.

- ● True
- ○ False

7 Multiple Choice 1 point

Which one of these is an example of AI in daily life?

- ○ Washing dishes by hand
- ● Asking Alexa to play music
- ○ Walking your dog
- ○ Watching TV with the remote

8 Multiple Choice 1 point

Which term describes a machine or system that interacts with the environment to achieve a goal?

- ○ Deep Learner
- ● Intelligent Agent
- ○ Expert System
- ○ Auto-Responder

9 True or False 1 point

Artificial General Intelligence (AGI) is a type of AI that can perform a wide range of tasks like a human.

- ● True
- ○ False

10 True or False 1 point

Today's AI systems are considered Artificial General Intelligence (AGI).

- ○ True
- ● False

11 Multiple Choice 1 point

Which of these is an accurate hierarchy of terms from broad to specific?

- ○ DL > ML > AI
- ○ AI > DL > ML
- ● AI > ML > DL
- ○ ML > AI > DL

12 Multiple Choice 1 point

Who is credited with the Turing Test, which asks whether a machine can imitate human responses?

- ○ Elon Musk
- ○ Geoffrey Hinton
- ● Alan Turing
- ○ John McCarthy

13 True or False 1 point

AI can currently understand emotions the way humans do.

- ○ True
- ● False

14 Multiple Choice 1 point

Which of the following would most likely use Deep Learning?

- ○ A basic calculator
- ● A voice assistant recognizing speech
- ○ A word processor checking spelling
- ○ A microwave oven

15 True or False 1 point

The term "Artificial Intelligence" was first used in the 21st century.

- ○ True
- ● False
